macOS

Android

iOS

The Problem

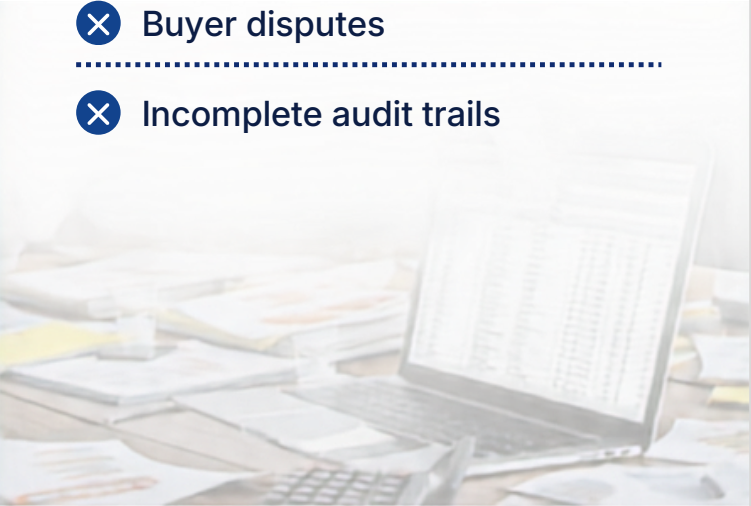

Used-asset operations still rely on disconnected decisions.

Every asset needs to move quickly through inspection, grading, pricing, and resale.

When these steps are managed across spreadsheets, manual checks, and separate systems, teams lose consistency, visibility, and value.

The result is familiar:

- ✗ Inconsistent quality checks
- ✗ Subjective cosmetic grading
- ✗ Incorrect value assessment
- ✗ Slow asset decisions
- ✗ Buyer disputes
- ✗ Incomplete audit trails

The Gadget IQ Approach

One connected workflow for every asset

GadgetIQ brings diagnostics, cosmetic grading, valuation, and decision intelligence into a single platform.

From intake to resale, every step writes back to the same asset record. This gives teams a consistent and transparent way to evaluate condition, compare recovery options, and make faster decisions across operators, locations, and channels.

The result is a complete condition and value story for every asset moving through your operation.

Business Impacts

Standardized evaluations

Consistent outcomes across teams and locations.

Faster decisions

Move assets forward without manual hand-offs.

Stronger value recovery

Identify the best commercial outcome for every asset.

Built-in traceability

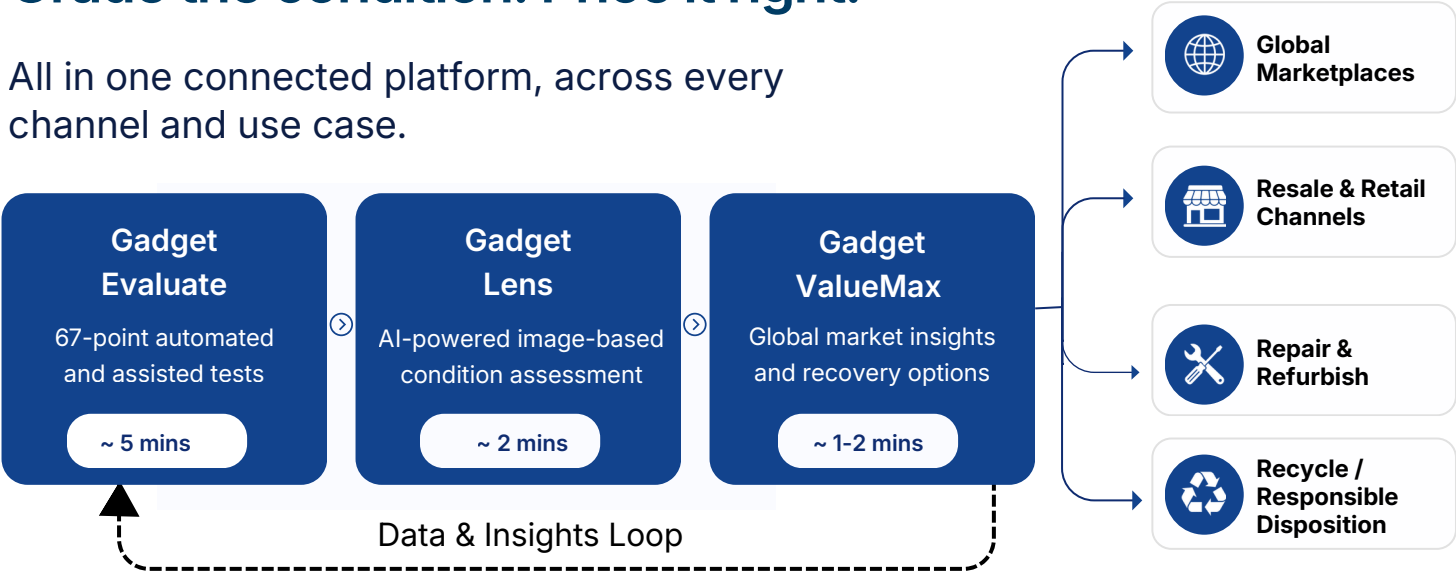

Every test, image, grade, and decision stays connected.

UNIFIED WORKFLOW

Test the device.

Grade the condition. Price it right.

All in one connected platform, across every channel and use case.

Gadget Evaluate

Test, certify, and move assets faster with structured diagnostics built for high volume operations.

Key Benefits

- Multi-point automated and assisted diagnostics
- Average Diagnostics time < 6mins
- Secured cloud-based certificates

Gadget Lens

Replace subjective visual checks with consistent, image-based cosmetic assessment.

Key Benefits

- Standardize grading across operations
- Average Grading time < 2mins
- Image-backed records for audit

Gadget ValueMax

Evaluate buying, selling, repair, and resale options globally to maximize asset value.

Key Benefits

- Access cross-border resale signals
- Decision Engine for Repair and Sell
- Maximize recovery from assets
