Erasure certificate XCW-2026-0728-441 · terms on page 4

We certify that the device identified above has been assessed by XtraCover under the XC-QC Quality Assurance Standard v2.4 and meets all applicable criteria for certified refurbished equipment. This certificate is issued on the basis of the diagnostic results recorded on pages 2 to 4.

TESTING STANDARD & PASS CRITERIA

Testing standard	XC-QC Quality Assurance Standard v2.4
Pass criteria	All applicable mandatory tests pass · battery health ≥ 80% · storage wear ≤ 10% · no critical SMART flags
Diagnostic engine	GIQ LP.W7sp1x64p3112.25.2607.01LAD
Calibration set	XC-CAL-2026.07
Test window	28 Jul 2026, 14:39 – 14:56 IST (UTC+05:30)

A device is certified only when every applicable mandatory test passes. Tests marked N/A relate to hardware not fitted to this configuration and are excluded from the denominator; they are not failures and do not reduce the result.

Technical specification

Values resolved from device firmware and verified against manufacturer reference data.

NOT FITTED ON THIS CONFIGURATION

Optical disk drive · SD card reader · Discrete GPU · Wired Ethernet port · PCI Express expansion slots

Absent hardware is reported once here rather than as repeated specification rows. Tests for these components are marked N/A, not failed.

Component serial numbers, unmasked network identifiers and per-module memory detail are recorded in Appendix A, available on the audit copy of this certificate. Network hardware addresses are masked on customer copies to limit persistent-identifier disclosure.

28 Jul 2026, 15:10	QA review & release	Quality	XC-Q-0114

AUDITOR NOTES & EXCEPTIONS

No exceptions recorded.

Camera video capture returned N/A due to a vendor driver limitation in the test environment; still-image capture was verified functional. This is not a device fault and does not affect the overall result.

REGULATORY & ENVIRONMENTAL COMPLIANCE

REFURBISHMENT STANDARD

R2v3 aligned

Facility operates to R2v3 Appendix C for equipment reuse.

WEEE / EPR

Registered producer

Registration IN-EPR-2024-88213. Free take-back at end of life.

ENVIRONMENTAL SAVING

≈ 316 kg CO2e avoided

Versus manufacture of an equivalent new notebook.
